MERDHULAN M

MERDHULAN M | merdhulan373ppt@gmail.com | Chennai, India | +91 9176144661

Summary

Motivated MCA graduate with a strong academic foundation in network fundamentals, system troubleshooting, and web development. Equipped with sound logical problem-solving skills across routing configurations, operating systems, and relational databases. Eager to leverage technical knowledge to resolve complex IT issues, optimize system performance, and support corporate technology infrastructure.

Education

2023–2025 **Guru Nanak College**, Master of Computer Applications (MCA) **GPA: 8.4**

Experience

BLiS by Wedtree Dec 2025 – Present
IT Web Developer and Maintenance Trainee

- Engineer and refresh dynamic e-commerce web pages using HTML, CSS, JavaScript, and Liquid on the Shopify platform.
- Design and implement reusable custom theme blocks to enhance content flexibility and site architecture.
- Manage and optimize the mobile shopping application interface using Vajro (Superfans) to drive user engagement.
- Perform daily site diagnostics, debugging, and continuous performance tuning to maintain fluid platform uptime.
- Leverage generative AI development tools to accelerate content layout prototyping and asset deployment workflows.

Careerschool HR Solutions July 2025 – Jan 2026
Python with AI Intern

- Architected core object-oriented programming frameworks and machine learning algorithms using Python.
- Formulated data-driven artificial intelligence workflows to automate and streamline routine data profiling pipelines.
- Participated in full-cycle software project sprints from baseline requirements analysis up to final logic validation.

Pentagon Innovations Feb 2025 – May 2025
Intern Developer

- Co-developed a responsive, web-based Inventory CRM platform utilizing a stack of HTML, CSS, JavaScript, and SQL.
- Engineered relational database schemas and optimized CRUD queries to handle transactional inventory and client datasets.
- Collaborated closely in an agile team setting to translate client business requirements into intuitive UI features.

E Silicon Labs Nov 2024 – Jan 2025
Research Analyst

- Conducted systematic UI/UX usability research for cross-platform medical web and mobile application prototypes.
- Audited interface wireframes against global accessibility standards to guarantee universal consistency.

Certifications

CCNA: Introduction to Networks Cisco Networking Academy
CCNA: Switching, Routing, and Wireless Essentials Cisco Networking Academy

Skills

Languages: Python, SQL, HTML, CSS, JavaScript, Liquid
Technical Tools: Git, GitHub, Figma, VS Code, Shopify, Vajro (Superfans.io), Vercel, Basic Troubleshooting, Basic Networking
Operating Systems: Windows, Linux (basic)

Projects

Personal Portfolio Website

- Designed and deployed a highly responsive portfolio to display technical projects, interactive animations, and custom

layouts.

– Hosted and managed continuous deployment cycles using Vercel for high-availability access. [Live Link]

Inventory CRM System

– Built a web application with complete CRUD functionalities using a frontend stack coupled with structured SQL backend scripts.

– Implemented adaptive viewports to render complex metrics dashboards beautifully on desktop and mobile viewports.

Python & AI Applications (Careerschool HR Solutions)

– **Desktop Music Player:** Integrated the YouTube Music API to allow media streaming, query management, and playback UI controls.

– **Terminal-Based Logic Engines:** Programmed interactive command-line simulators (Dice Roll, Rock-Paper-Scissors) featuring strict user-input sanitization loops and randomized conditional tracking blocks.
